

Experienced Faculty Teams from Different Disciplines Will

- Demonstrate integrated curriculum and team teaching combining basic skills or ESL and a given field
- Teach hands-on strategies that put reading, listening, speaking, and math skills into engaging and experiential learning contexts for students
- Detail how to create bridge or career pathways programs that by design increase student success as well as create a generation of new FTE and tuition dollars

(by reservation only)

Space for this workshop is *extremely limited*; please **RSVP no later than 12Noon on Friday, May 2nd**. Email is preferable: SuccessNet@email.laccd.edu. Or call **213-891-2361**.

presents

The Tipping Point for Essential Skills Students

“Taking Students from Where They Are to Where They Want to Be”

Date: May 9th
Time: 9 a.m.-3:00 p.m.
**Location: Monarch Hall,
Los Angeles Valley
College**

Delicious Catered Food will be Served!

Featuring Washington State's
I-BEST:
**Integrated Basic Education
and Skills Training**

In Washington state, Pierce College's I-BEST programs pair a basic skills instructor with professional-technical instructors in all content classes with 100% overlap instruction. All I-BEST programs focus on experiential learning which employs a variety of skill training techniques that include simulations, learning laboratories, and skill demonstrations on both soft and technical skills. Most importantly, basic skills, workforce skills, and course content are taught concurrently by instructional teams. I-BEST has a proven track record in innovative education resulting in marked improvement in student access, success, and persistence.

The day will also feature an innovative new program from California's Bay Area. Laney College's Carpinteria Fina successfully combines ESL, math, English, as well as some bilingual instruction in fine woodworking.
